WEATHER SYNOPSIS BY REGION

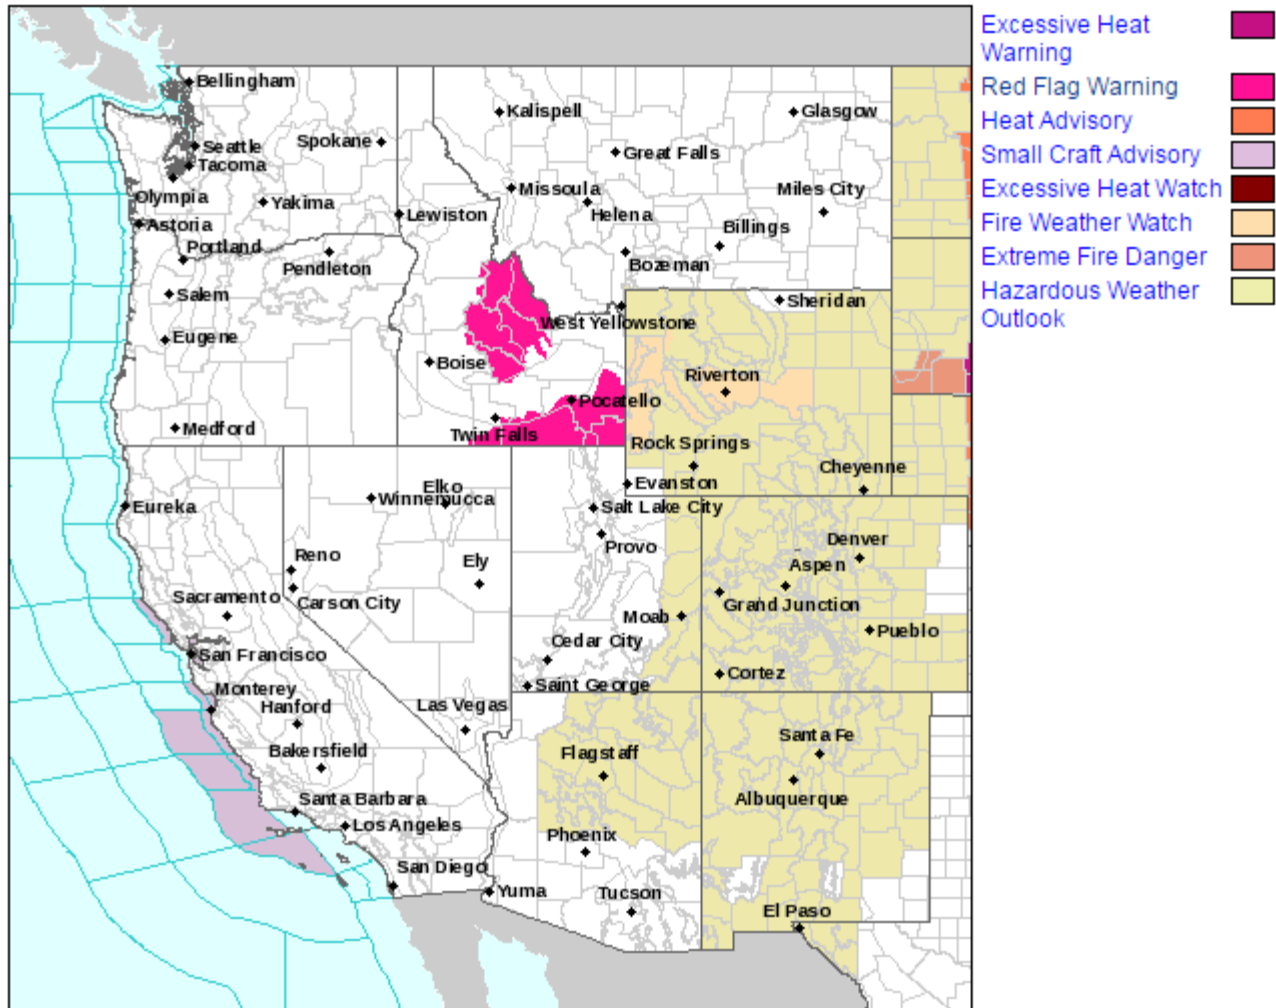

NORTHERN CALIFORNIA

Low pressure over the Pacific Northwest will open up and become a southwest-northeast aligned trough on Tuesday, then finally move inland late Thursday. Strong high pressure will remain stationary over the Southern Plains during this time. This pattern will produce a moderate to strong southwest flow over Northern California, and through Tuesday the low pressure will have more influence on our weather. A few showers are possible in northern areas today and Tuesday, and there is a slight chance of afternoon thunderstorms across the far northern areas late Tuesday. Any thunderstorms or showers that develop will produce light rainfall, but any lightning that occurs could still be a mix of wet and dry. Southwesterly winds from the higher terrain of the Sierra (5000'+) and east into Northwest Nevada will gust to near 40 mph today and 35 mph on Tuesday. The minimum afternoon RH in those areas will be 10-18%. Temperatures will be 5-10 degrees below normal through Tuesday. Wednesday will be warmer with lighter winds. The trough is expected to move east across Northern California late Thursday and produce more wind across northern and eastern areas. There is a slight chance of thunderstorms in the far north late Thursday as the trough moves through. High pressure will return and produce a warming and drying trend Saturday into the middle of next week. Night and morning northerly surface winds will enhance the warm and dry conditions, but typical summer afternoon upslope winds are expected each day.

SOUTHERN CALIFORNIA

A weak Pacific trough over the West Coast will maintain near to a little below normal temperatures today, with mid 70s to mid 80s across the mountains and mid 80s to mid 90s in the valleys. High pressure over the central part of the country will expand westward bringing a slow warming trend Tuesday through this weekend. Widespread triple digit heat will occur in the valleys starting Thursday. Minimum humidity will be mainly in the teens away from the coastal areas through Wednesday and then there will be more in the way of single digit minimum humidity Thursday through this weekend. Southwest to west afternoon winds of 15 to 25 mph with gusts to 40 mph will surface across the desert slopes and passes through Thursday. There will be northwest to north night winds of 15 to 25 mph with gusts to 40 mph across the mountains of Santa Barbara County eastward to the Grapevine Area as well as over the Tehachapi Mountains Thursday through Saturday.
